Project Atlas

Release Approval

This fictional report is a test fixture for checking PDF retrieval and page citations. It describes no real release.

Release ATLAS-R12 requires approval from both the quality lead and the operations lead.

All required integration tests must pass before approval. A passing test run alone does not authorize the release.

Project Atlas

Build Failure and Recovery

Build ATLAS-418 failed because the artifact registry access token had expired.

Before rerunning ATLAS-418, rotate the registry access token and verify that the build runner can authenticate to the artifact registry.

This report does not specify a production deployment date.
